

Cup Sleeve Template

This template will allow you to easily make a non-disposable cup sleeve for your coffee, tea or any other hot beverage item. Instead of wasting resources by using disposable paper sleeves, by making your own sleeve you can both save the environment and have your own stylized hand-insulator. Brown is such a boring color anyways.

Humbly offered by some random dude.

Instructions:

Use template as a guide to cut material. Make sure to mark fold points and line B. After material is cut, wrap material around so that point A lines up with point B. Make sure edge A lines up with edge B.
